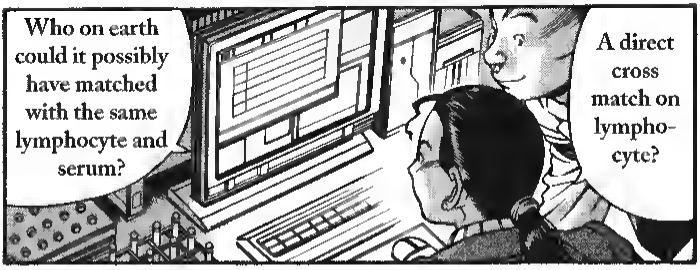
Kisaragi -san
Over here!!

He thinks it will eventually pay out.....
My darling is completely taken with a certain slot machine
When we announce something good, it's going to be something ♡bad really
What business do I have here at a time like this?
. . . . . .
No, thanks !!
so you would like a drink to help you relax?
You'd be prone to worry, Kisaraki-san
生化学検査室
(血液・尿検査、採血
is a bad thing to announce, huh?
Of course, something like that
This is the results of a direct cross match. Please, have a look
What's that, the emergency case?
That's what I would like to know
Huh? What are you doing here at a time like this?

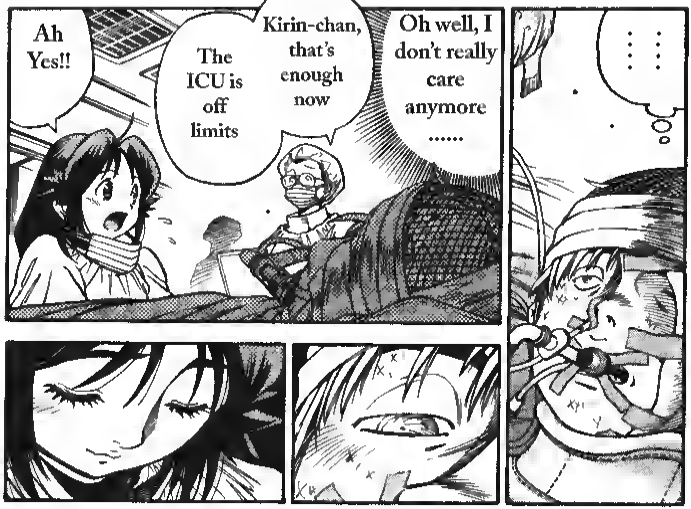


被検者 長谷川貴鈴（ハセガワキリン） *Hasegawa Kirin !!

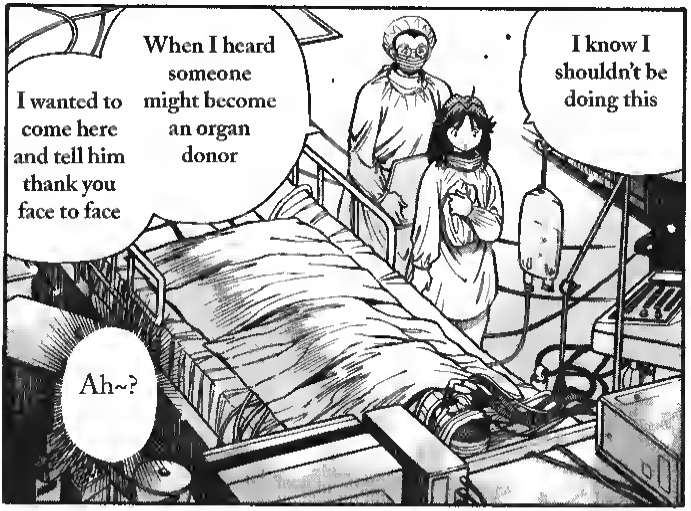
臓器提供意思表示カード
An organ donation card!!
He was carring this ♡with him
Who on earth's serum was that?
When they found him his heart wasn't beating but they were able to revive through CPR
After that he came to but it's still uncertain whether....
He was transported here by ambulance five hours ago
He has a laceration on his front temporal lobe area
So
Where is this person now?
What~ But I thought you'd be happy about it
What you're suggesting is a violation of the human rights!! We could be investigated for that!!

Is this heaven!?
huh?
ICU
集中治療室

This "Angel" is too beautiful for words to describe!!
Uhahaha haaaa!!
Is this real?
Why am I here in heaven then?
Come to think of it, I --
How did I die?
Will she be accompaning me?
I didn't do anything to anger anybody!!

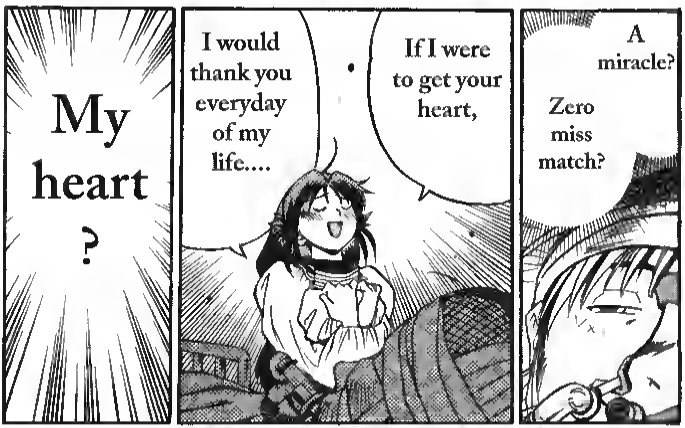


Ah Yes!!
The ICU is off limits
Kirin-chan, that's enough now
Oh well, I don't really care anymore .....
. . . .

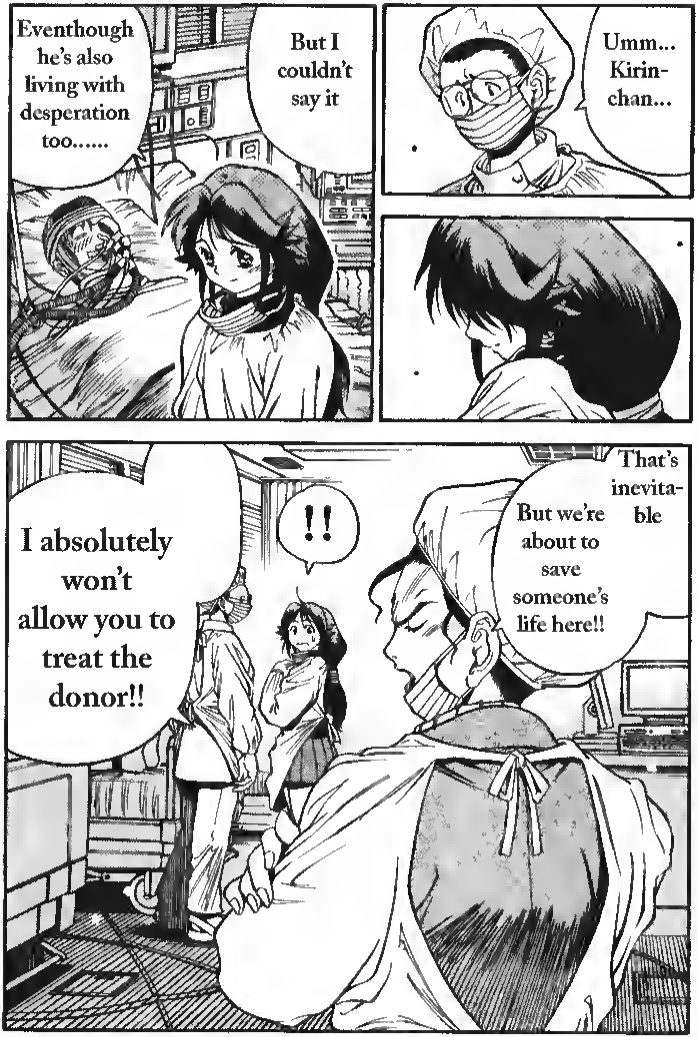


I wanted to come here and tell him thank you face to face
When I heard someone might become an organ donor
I know I shouldn't be doing this
Ah~?

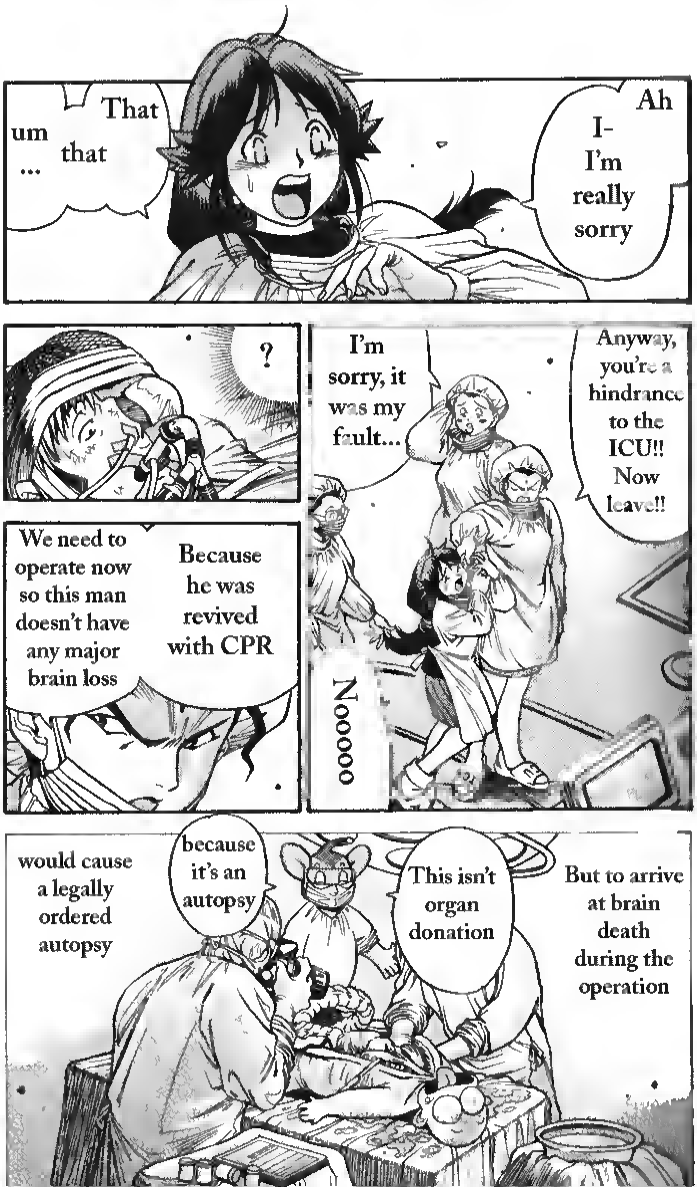
Things like this must be a miracle
You and me are a zero miss match
Our HLA test and Direct Cross Match test results say we are completely compatable
We both have the same blood type, AB



My heart ?
I would thank you everyday of my life....
If I were to get your heart,
A miracle?
Zero miss match?

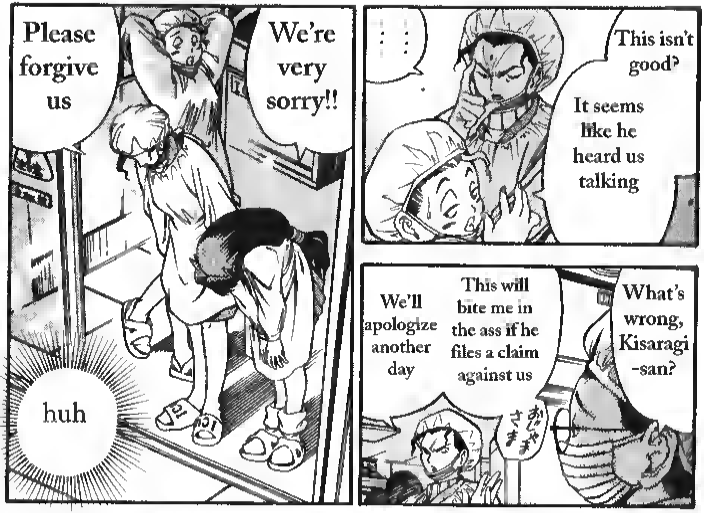


Eventhough he's also living with desperation too.....
But I couldn't say it
Umm... Kirin-chan...
I absolutely won't allow you to treat the donor!!
!!
But we're about to save someone's life here!!
That's inevitable



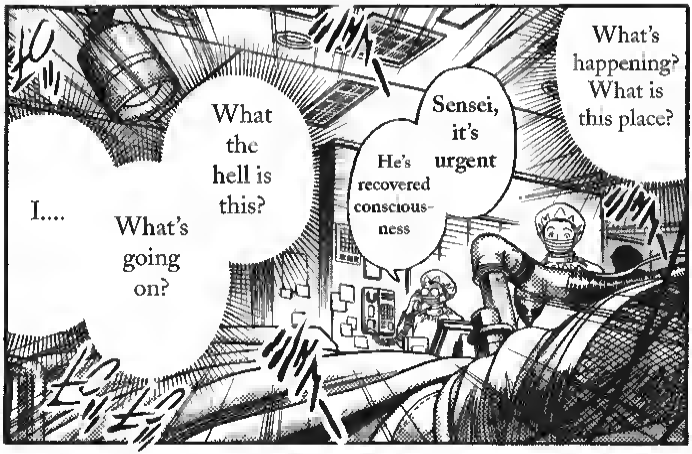
um ...
That that
Ah I- I'm really sorry
?
I'm sorry, it was my fault...
Anyway, you're a hindrance to the ICU!! Now leave!!
We need to operate now so this man doesn't have any major brain loss
Because he was revived with CPR
Noooooo
would cause a legally ordered autopsy
because it's an autopsy
This isn't organ donation
But to arrive at brain death during the operation

Agha?
Organ transplant is a delicate....
If you understood anything I was saying, you would've stopped this foolish behavior!!
Autopsy!?
Brain dead!?
は
Organ Transplant!?
が

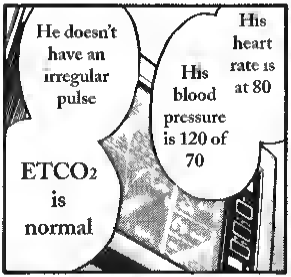


Please forgive us
We're very sorry!!
huh
This isn't good?
It seems like he heard us talking
What's wrong, Kisaragi -san?
We'll apologize another day
This will bite me in the ass if he files a claim against us
おやすみ

This isn't heaven!!
Auu
What's going on!!
What
What is this
Ogaaa



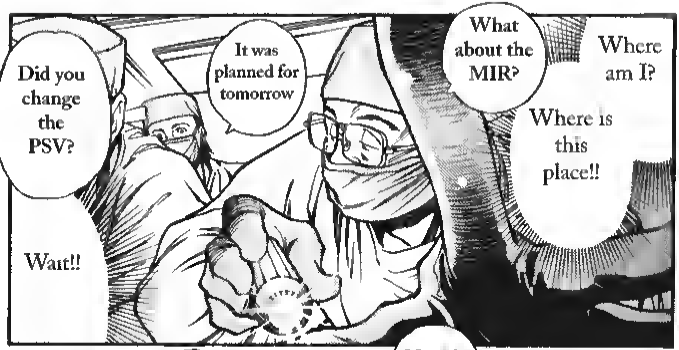
What's happening? What is this place?
Sensei, it's urgent
He's recovered consciousness
What the hell is this?
I....
What's going on?



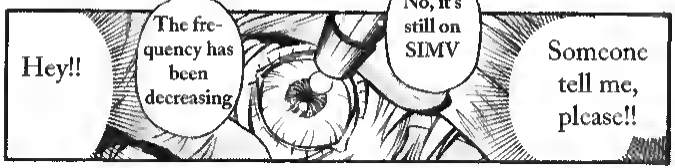
He doesn't have an irregular pulse
His heart rate is at 80
His blood pressure is 120 of 70
ETCO2 is normal

That was rather quick
There doesn't seem to be a problem with the CT
Are you monitoring his electro-cardiogram?
Yes, there hasn't been any abnormalities

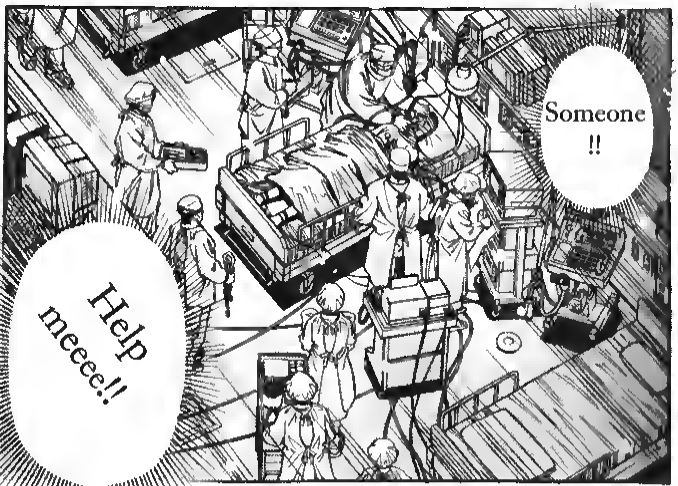
Can they hear my voice?



Did you change the PSV?
It was planned for tomorrow
What about the MIR?
Where am I?
Where is this place!!
Wait!!



Hey!!
The frequency has been decreasing
No, it's still on SIMV
Someone tell me, please!!



Someone !!
Help meeee!!

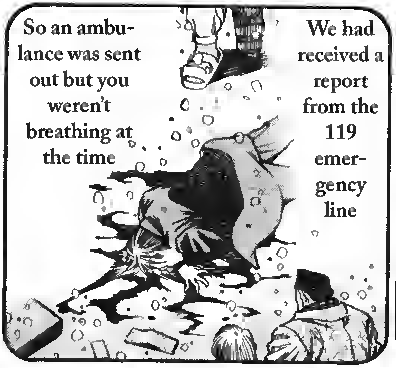
Your name?

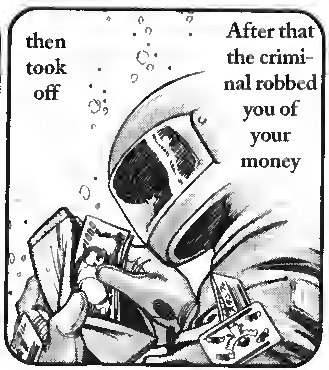
Kuzumi ....
Kuzumi Kentarou
How old are you?
. . . . .
22 years old
I graduated from high-school
I went to the store to pick up a bentou with low agricultural chemicals for an old man as an agreement we had
At least I still have my looks!!
hmm

There shouldn't be a problem if you can remember stuff that vivid
That's good enough
クスッ
I-
How did I get this huge wound?
About that, doctor !!
No matter how hard I think, I can't remember it!!
I think I can be of some help there
Umm
Don't over work yourself
You shouldn't be thinking about it
ふむ…

You, Kuzumi-san, were struck with a iron pipe by a young man wearing a helmet
According to the eyewitness it took place in the area of Motosawa



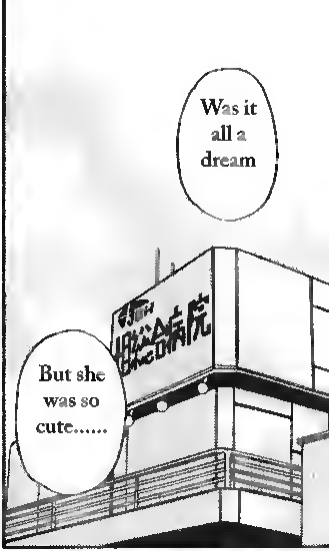
So an ambulance was sent out but you weren't breathing at the time
We had received a report from the 119 emergency line



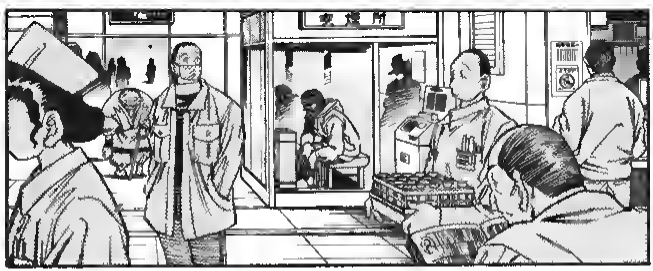
then took off
After that the criminal robbed you of your money

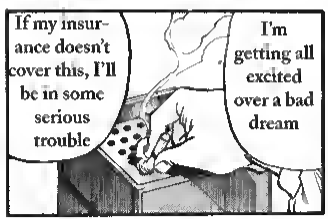
Once you started breathing again they transported you here
Because of that the ambulance workers had to use CPR and apply an artificial resporator

I will submit a damage report
If you remember anything please let me know....
It felt like I saw an angel!!
HAA ?
Idiot



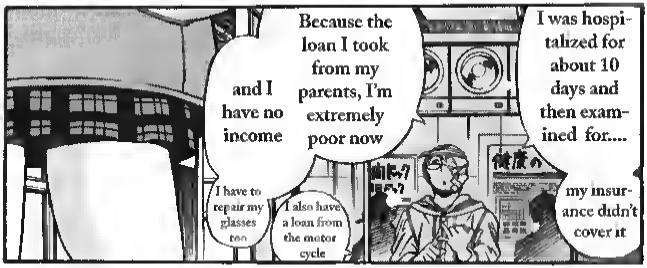
Was it all a dream
But she was so cute.....





If my insurance doesn't cover this, I'll be in some serious trouble
I'm getting all excited over a bad dream

Maybe that's what heaven is like



I was hospitalized for about 10 days and then examined for....
my insurance didn't cover it
Because the loan I took from my parents, I'm extremely poor now
and I have no income
I also have a loan from the motor cycle
I have to repair my glasses too

My life is ♡ awful
Things are looking dark...

"Kuzumi-san was robbed of 3,000 yen...the criminal got away"
See

Give me your money!!
So you don't remember anything about the criminal?
It would of been better if he attacked some rich guy
The criminal was an idiot

Nope
Well, it doesn't matter!! My life is only worth 3,000 yen anyhow
Fish?
That reminds me, there seemed to be some fish object near his hip

That ....
No well, that ...
That can't be true
It's true!! I'm probably worth less than that

No
So this person arranges to get the organs from the donor
People with bad hearts, kidneys and such
Can't continue to live if they don't get an organ transplant

The Organ Transplant Cordinator is the one that scouted me
There are such things like that
I, the holder of the card, offer to give up my organs upon death
During class they handed out organ donation cards
Just think it over
She certianly thought I possessed the right qualities or disposition...
I wonder?
So is the money any good?
I never said they sold organs
So you're going to be a gangster
Huh?

the earth's history
is that of extinction
About five hundred million years ago

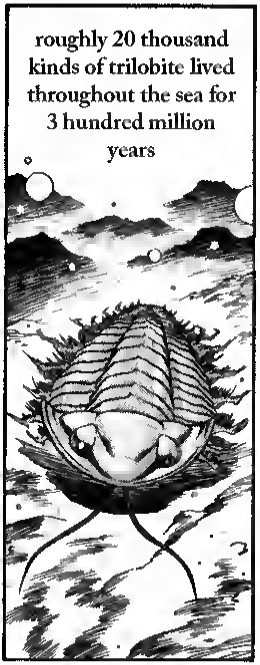
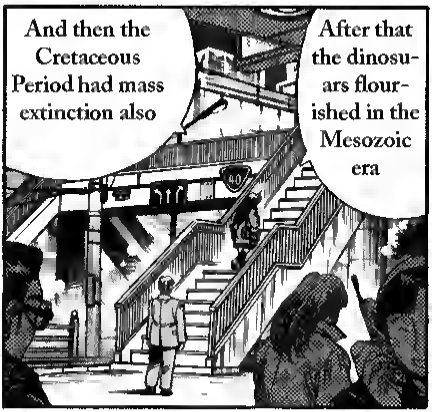
the earth was suddenly treated to an eruption of large living creatures

But then mass extinction took everyone out



roughly 20 thousand kinds of trilobite lived throughout the sea for 3 hundred million years



And then the Cretaceous Period had mass extinction also
After that the dinosuars flourished in the Mesozoic era

eventually go extinct too someday

Medical Check 1

Organ Donation and the Japanese Organ Transplant Network

In part of the book it mentioned the Organ Transplant Information System which is a fictious model of the Japanese Organ Transplant Network. This is the story of how they came to be and an outline of the current state

Letters/ the Result(Medical Journalist)

Do you know about the Organ Transplant Network?

The first heart transplant in the world, in 1967, was peformed by Christiaan Barnard in South Africa.

A person's body has various functions. The break down of a function, and the deterioration from a disease, medicine and surgical equipment has a limit to how much it can cure of this.

Exchanging a bad internal organ for a healthy one is called an organ transplant.

The organ donor and the recipient are arranged before hand. Naturally, there are rules that go along with this.

In 1997 Japan's Organ Transplantation Law was finally established creating the Organ Transplant Network. The goal of the network is said to establish fairness and impartiality. Although the Kidney Transplant Network, which was established before the Organ Transplant Network and more well received, was associated with the accession of the soul because the operation can be done while still alive, since a person can live with only one kidney.

For convenience the kidney banks are located near a university hospital in the area, which has become the core institution, so now when a donar appears the organ can be offered to the most suitable patient at the hospital.

When the Ministry of Health and Welfare guided the establishment of the Japanese Kidney Transplant Network in 1995, it became a national corcen on how the organs should be offered.

In '88 the japanese medical association recognized brain death as death but the general public didn't recognize brain death as death. So organ donars must be attached with a donar card that states brain death is death.

Until this kidneys were the only thing being transplanted. Nowadays the Japanese Organ Transplant Network has crossed over to hearts, lungs, livers, kidneys, pancreases among many others and many people are registering to donate. Before organ transplantations, there was no other effective treatment for people.

So, Organ Transplant should be thought of as a viable medical treatment. I remember a women giving a speech some years ago(She had studied heart blood vessel surgery and was the Section cheif at St. Luke's International Hospital). She said, "Organ Transplantation is the thing of leading the weak by the hand across a cross walk"

According to the Organ Transplant Network they will have 84,700,000 organ donation cards distrubuted throughout Japan by 5/2003 Japan has a population of 120 million.

The judgement was that a person who wants to donate their organs on brain death had to choose which organs they wanted to donate by circling the organs on the organ donation card. You can obtain a card at the supermarket, hospital, pharmacy, convenience store, and so forth.

People are starting to go out of the country to get a heart transplant since you can only get a heart from a brain dead donar and there is not a lot of people in japan willing to donate their organs upon brain death. The disease cardiomyopathy causes the weak ventricle to stretch out from the contractions of the heart(most heart transplants are because of this disease). But another person with the same disease and complications with high blood pressure was planning to leave to Germany for a simultaneous heart and lung transplant.

In Japan the amount of organs being actually donate in the last five years is a absolutely insuffecient. In suffecient amount of donors has become a problem for many other nations. The criticism is starting to rise on the long wait to get on the waiting list.

Because of this people have given up on helping the weak recipients. The proactive organ donors haven't been gaining in the cause either.

Organ Trans-plant
Poeple need to understand that the decline of an organ's function is a life crisis
But you must divida tha organs fairly and impartiality
You aaad a willing donor aad a potiant to trons-plaat tha organ to
Recieving a healthy organ from someone is the only method of recovery
the Organ Transplant Coordinators!!
And the one who supports all this are
A living body, A brain death body, ond heort failure body ere all verious types of organ donors

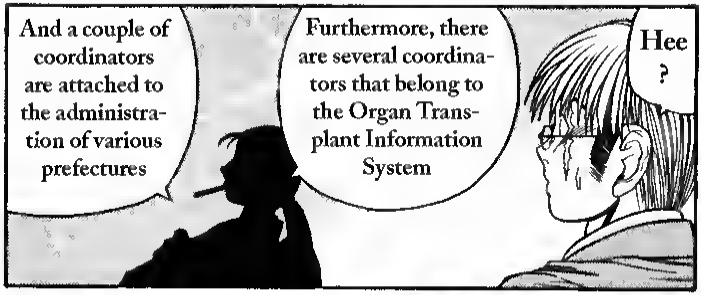
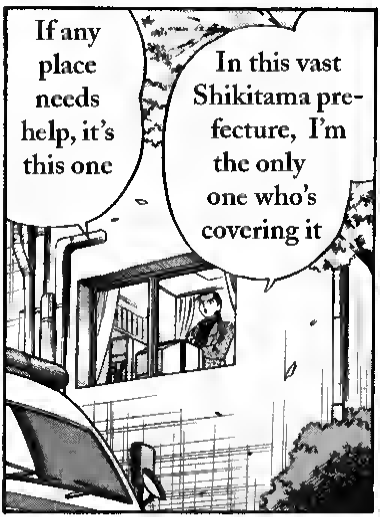
Ha?
To become an Organ Transplant Coordinator you need to have graduated from a 4 year college or have the national medical care requirements
And if you don't take the trainee courses sponsored by the Organ Transplant Information System then you can't become one

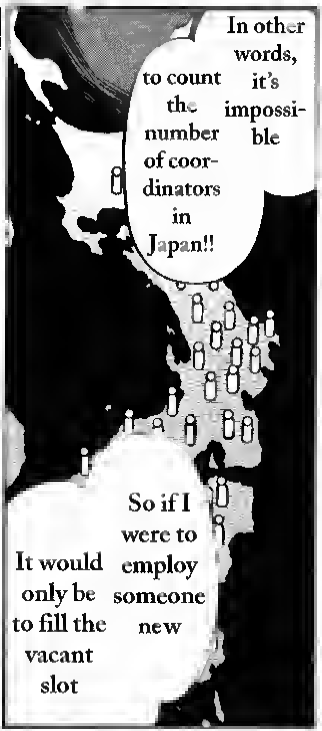


And a couple of coordinators are attached to the administration of various prefectures
Furthermore, there are several coordinators that belong to the Organ Transplant Information System
Hee ?

It's Impossible
Furthermore, there are hundreds of obstacles you have to get through first



If any place needs help, it's this one
In this vast Shikitama prefecture, I'm the only one who's covering it



In other words, it's impossible to count the number of coordinators in Japan!!
So if I were to employ someone new

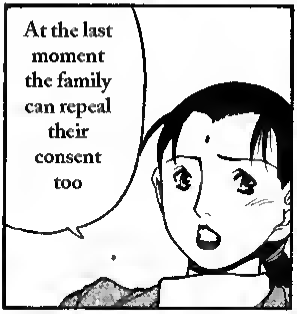
When the blood flow stops in cardiac arrest
the organs in the body go bad rapidly
Because removing the organs
stops the blood flow, it's best to refrigerate it as soon as possible
The heart and lungs go bad as soon as it stops
and for a kidney you have less than 30 minutes before it starts
and you have less than 24 hours to transplant it from there

If the kidney gets refrigerated right after surgery
then you have 48 hours to transplant it
but if it doesn't get refrigerated till 30 minutes after
then it's best to transplant it within 12 hours



At the last moment the family can repeal their consent too
